Testrun
Release and roadmap

December 2024

TEST RUN

Roadmap themes

Each roadmap item supports one or more themes.

User Experience
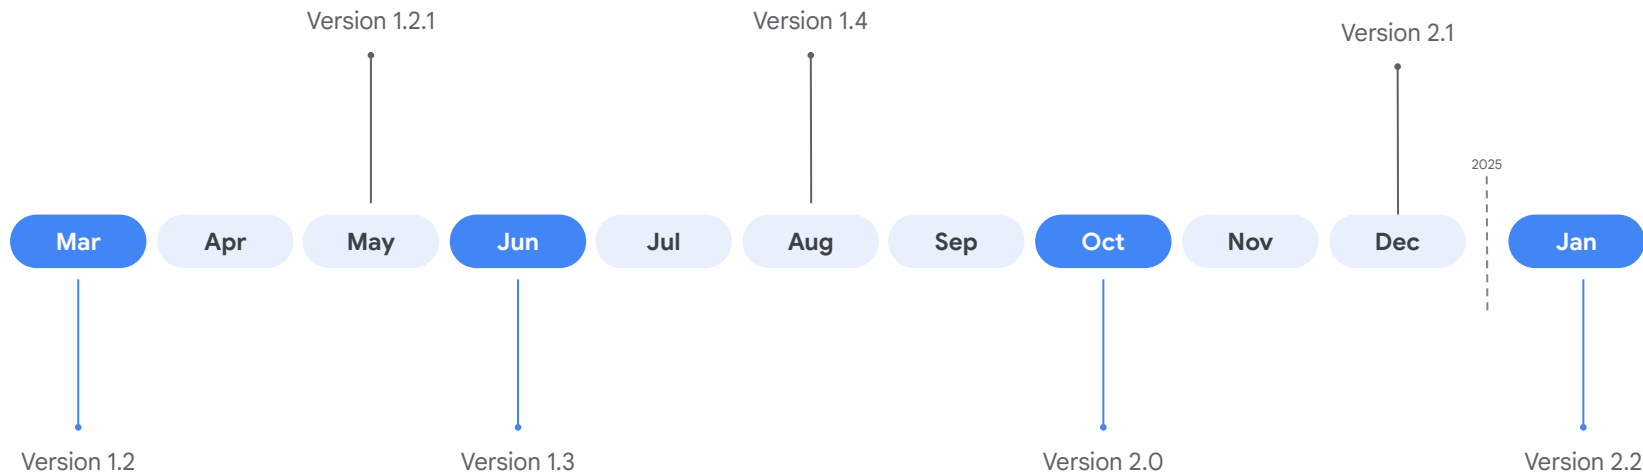

Device Testing

Platform Support

Accessibility

Release schedule

We release feature additions each quarter.

> We plan only two quarters at a time to allow user feedback to inform the roadmap.

Version 1.2.1 — May

Version 1.4 — Aug

Version 2.1 — Dec

2025

| Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan |

Version 1.2 — Mar

Version 1.3 — Jun

Version 2.0 — Oct

Version 2.2 — Jan

* Hotfixes aren't planned but we allow for them during resourcing.

TEST RUN

Up to **now**

Release v1.4
Addition of new informational tests and MQTT communication between the user interface and API.

Release v2.0
Support provided for pilot device assessments - facilitating an entire new use case.

We are here

Release v2.1
A release focussed on bug fixes and testing improvements.

The future
A new tool is being developed and released in 2025. Development work on Testrun is expected to slow down but maintenance will still continue.

Google

Google

Version 2.1
Test improvements

v2.1

Major release at the end of Q4 2024

Extended TCP port scan

All TCP ports are now included, providing a more thorough scan of the device's services.

Device Testing

TLS module report

The TLS module now provides a detailed report to help the user and labs understand the security of web services.

TLS module report

Design preview

Design preview

Additional information is now available in the TLS module report to provide a more detailed understanding of TLS services.

Google

Version 2.2
UI refresh

v2.2

Major release at the start of Q1 2025

Material 3 refresh

The UI will receive a complete refresh using Google's Material 3 design framework.

User Experience

Pilot support feedback

In response to user feedback, the pilot testing process will see some minor tweaks.

TEST RUN

Material 3 refresh

Design preview

Design preview

Whilst the majority of the functionality will remain the same, each element now uses Material 3.

Material 3 refresh

Design preview

Design preview

The device repository will receive a new look, allowing for easier management of your devices.

We are here

What's
next

Version v2.1
A release focussed on bug fixes and testing improvements.

Version v2.2
The user interface will receive a Google Material 3 refresh to ensure our users have the best experience possible.

The future
A new tool is being developed and released in 2025. Development work on Testrun is expected to slow down but maintenance will still continue.
